CDJ-200 with MP3

Ultimate Design - Ultimate Performance

The CDJ-200 sets a new standard for MP3 CD decks by combining great design and durability with pro-grade features and performance.

Building on Pioneer's reputation for technological superiority, this new player takes key elements from Pioneer's range of industry standard Professional CDJ players and introduces innovative features such as full-function MP3 playback, Hot Loop, Beat Loop and Pioneer's unique one button Beat Cutter. This technical brilliance is backed up by practicality – the unit is robust, compact and portable – and a stunning design, ensuring that the CDJ-200 will appeal to the serious home DJ, bars and other installations where space could be limited.

MP3 masters

In recognition of the increasing popularity of MP3 as a download format for many aspiring DJs, the CDJ-200 is fully MP3-compatible.

This now means DJs can include the very latest tracks in their sets, without the need to spend time converting audio from other formats to MP3. And it's convenient during playback too, since the unit has an MP3 folder search function and will scroll the name of the disc, artist and current track within its bright dot-matrix display window.

Right on-cue

This screen also has a bar graph showing the elapsed and remaining playing time of a track and an Auto BPM Counter giving DJs real-time information they need to create better mixes more quickly. There's a tempo read-out too, as well as a separate Master Tempo button with 3 settings for locking the pitch of a track as it's sped up or slowed down.

The CDJ-200 has an impressive range of cue and loop features, including Loop & Out Adjust / Hot Loop and a new Auto Beat Loop & Loop Cutter that can be used to create loops within loops until the beat has been cut to infinity. These functions give DJs all the options they need to push creative boundaries and deliver the best performances.

A guiding light

The unit has another unique feature – an electric-blue light that's used at strategic locations to give the DJ constant feedback on the status of the CD and the effects being used. The light above the CD-slot, for example, indicates when there's no disc loaded and guides the DJ to the CDJ-200's user-friendly quick-load slot. With the disc inserted, the light goes off and a blue illuminated ring appears around the edge of the Jog Wheel – indicating that a CD is ready to be played.

An established highlight of Pioneer's Pro DJ CD players, the Jog Wheel, can be used to speed up or slow down the music, to fine-tune cue points manually, or to control the mix with the help of another proven feature – such as the Digital Jog Break. This has three effect buttons (Jet, Zip, Wah) for creating original sounds as the Jog Wheel is manipulated.

When the Digital Jog Break is on, the blue ring flashes quickly. Once the HOLD/RESET button is used, the flashing slows down and with the effects off, the continuous blue light returns.

Making it easy

There are many more user-friendly firsts built into the CDJ-200. For example, the Resume function means that if a CD is ejected accidentally, the DJ can quickly re-insert the disc and be sure it will start playing from exactly the point where it stopped.

The CDJ-200 also has a Digital Out socket, so that all of the digital features available in DJ Mode can be carried over to a connected digital environment. A headphone jack (with volume control) enables monitoring of a CD without the need to connect the CDJ-200 to a mixer or external amplifier.

Combining these professional grade features, the intuitive design and exceptional build quality – the CDJ-200 sounds as good as it feels.

Fantastic features

- Full MP3 Capability
- Hot Loop
- 4 Beat Auto Loop
- Loop Cutter
- Bright Dot-Matrix Display with Scrolling Text
- Headphone Out + Volume Adjust
- Digital Out
- Auto BPM Counter
- Real Time Seamless Loop
- Quick slot load with blue LED
- Text Mode
- Digital Jog Break Effects (ZIP, JET & WAH)
- CD Text
- Fader Start
- 100mm Jog Wheel
- Cue/Loop Memory
- Tempo +/-6 (0.02%), +/-10 (0.05%), +/-16 (0.05%)
- Master Tempo
- Real Time Cue
- Auto Cue
- Manual Cue
- Pitch Bend
- Pause
- Track Search
- MP3 folder Search
- Oil dampened suspension
- Supports CD-R & CD-RW Discs

- **Beat Loop / Cutter**
- **Digital Jog Break Effects**
- **Slot Load with Blue LED**
- **MP3 Folder Search**
- **Headphone Jack & Digital Out**

CDJ-200

Compact Disc Digital Audio System

Functions

MP3 format	MPEG-1	Supports Audio Layer-3 sampling frequency 32 kHz, 44.1 kHz, 48 kHz. Bit Rate 32 Kbps - 320 Kbps.
	MPEG-2	Supports Audio Layer-3 sampling frequency 16 kHz, 22.05 kHz, 24 kHz. Bit Rate 16 Kbps - 160 Kbps. Does not support Variable Bit Rate (VBR).
	ID3 tag	Displays only file name, artist, album name. ID3 tag title not displayed.
Disc format	File extension	.mp3, .MP3, .Mp3
	Folder levels	Maximum of 8 folders. Files located in folders exceeding 8 levels cannot be played.
	Maximum number of folders	99 (99 folders + 1 root)
	Maximum number of files	999 (per folder)
	Multi-session	Does not support multi-session. When the disc used is a multi-session disc, only the first session will be played.
	CD-R recording method	Record following the ISO9660 CD-ROM file system. Supports only Disc At Once or Track At Once. CDJ-200 does not support Packet Write recorded discs.

Specifications

Power requirements	AC 220-240 V, 50/60 Hz
Power consumption	16 W
Operating temperature	+5C - +35C
Operating humidity	5 % - 85 %
Weight	3.2 kg
Dimension	216 (W) x 292 (D) x 99.5 (H) mm
Frequency response	4 Hz - 20 kHz
Signal-to-noise ratio	110 dB or more (JEITA)
Distortion	0.006 % (JEITA)
